ENVIRONMENTAL POLICY

The Environmental policy of Hitachi Rail STS is based on the application of the requirements of the relevant standards UNI EN ISO 14001:2015 and any other relevant rules applied at international level, and on the full compliance obligations with applicable national and international regulations.

Hitachi Rail STS is committed to:

- improve its activities also for the purpose of reducing its overall impact in terms of climate-altering emissions in the atmosphere;
- work in compliance obligations with the legal provisions applicable to its procedures, through the formalisation of procedures which support the knowledge of the relevant legislative framework;
- prevent environmental pollution and to the protection of the environment relevant to the context of the organization;
- identify significant environmental impacts of its activities, products and services for offices and sites in order to control and monitor impacts on the environments that are appropriate to the purpose and context of Hitachi Rail STS;
- involve staff, suppliers and contractors in the environmental issues, raising their awareness on this subject;
- improve environmental performance through the achievement of increasingly ambitious targets and objectives, consistently with the technological progress of the sector and with the budgeted expenses;
- define indicators for a straightforward monitoring of performances;
- start an open dialogue with the Public Authorities, the communities and the public, aimed at raising awareness of the real environmental impacts and cooperating to update environmental regulations.

In accordance with its mission, all Hitachi Rail STS staff is involved in the reduction and control of the environmental impact resulting from the company's business through the definition of well-defined targets and responsibilities. By doing so, Hitachi Rail STS aims at being recognised as one of the leading companies as regards environmental preservation and protection.
